

INTERNATIONAL HEADACHE ACADEMY – iHEAD (Europe)

Friday 21 October – Sunday 23 October 2016
London, UK

SAVE THE DATE!

The International Headache Society (IHS) is proud to sponsor the third European International Headache Academy (iHEAD), to be held in London, UK, from 21–23 October 2016.

iHEAD is designed to inspire a long-term commitment to Headache in young neurologists and research scientists via an educational programme focused on clinical and research aspects of Headache Medicine. It is our goal to develop and mentor future leaders in the field. We are targeting senior Neurology residents, Headache Medicine fellows and MD and/or PhD clinicians/researchers currently enrolled or within 5 years of having completed their training.

This 3-day programme will offer a highly interactive and intensive overview of Headache including pathophysiology, diagnosis, and management of migraine, cluster headache and related primary headache disorders. In addition, there will be a number of practical workshops on clinical trial methodology, biostatistics, physician-patient communication, evidence-based training including critical literature search and appraisal, manuscript preparation and publication, presentation skills and animal and human headache research methodology.

Programme and application details will be sent around within a few weeks. Registration, hotel and travel cost will be reimbursed by IHS. Please encourage young physicians or researchers in training to save the date.

Sincerely

On behalf of the local organising committee

Peter Goadsby
Michel Ferrari
Messoud Ashina
Arne May
Jean Schoenen

On behalf of IHS

David Dodick (President)
Lars Edvinsson (President-elect)
